

▶ Polycom Solutions At A Glance

▶ **Polycom Telepresence Solutions**

From life-like, fully immersive telepresence suites such as the Polycom® RealPresence™ Experience (RPX™) to the industry's premier personal desktop system, the Polycom® HDX 4000®, Polycom offers telepresence solutions for every application, location and price. With these solutions, companies realise a fast return on their investment (ROI), increased productivity and lower costs.

▶ **Polycom Video Conference Solutions**

From the Polycom HDX series of products to the Polycom QDX™ 6000 system and Polycom CMA™ Desktop, we offer videoconferencing solutions that enable groups to meet naturally over a distance. Your organisation can realise a speedy ROI as teams, regardless of their office size or workspaces, conduct more productive meetings and make decisions in real time over distances and time zones.

▶ **Polycom Voice Solutions**

The highest standard in communications, Polycom voice solutions have been driving the speed of business around the globe for nearly 20 years. From the Polycom SoundStation® IP 7000, the world's most advanced IP conference phone, to desktop, to one of the Polycom wireless solutions—Polycom's range of voice solutions are smart investments that yield effective meetings and a fast ROI as they connect people from the desktop, the conference room or while they're on the move.

▶ **Polycom Management Applications**

Providing complete management and high-scale deployment of room-based and personal telepresence solutions, desktop video clients and traditional video conference endpoints, the Polycom CMA 5000 solution enables organisations to streamline the management of their visual communications environments, reduce operating costs and help your company attain a quick ROI.

▶ **Polycom Infrastructure Solutions**

Polycom RMX conference platforms improve collaboration between remote teams by delivering incredibly clear video, audio and content for multiparty communication. To optimise and scale conferencing investments and help ensure continuous, high-quality conferencing throughout the enterprise, the Polycom Distributed Media Application™ (DMA) 7000 centrally manages and pools the processing resources of multiple Polycom RMX 2000 platforms. Polycom RSS™ 2000 and Polycom Video Media Center™ 1000 appliances record, store and stream video conferences, training sessions, project meetings and executive communications to thousand of viewers. To access these and other enterprise telepresence and video resources securely and in high quality, home office users and branch sites can leverage our complete portfolio of Polycom VBP security/ firewall traversal solutions.
