

See First. Understand First. Respond First.

In order to effectively respond and maximize efficiency during crisis situations, agencies must be able to communicate the sights, sounds and details of complex missions to decision makers. Improved situational awareness is critical to ensuring that well informed decisions are made.

That's why agencies trust Polycom to deliver voice, video and data collaboration solutions that improve situational awareness and on-demand access to people and information. Our solutions are engineered to ensure that users can easily connect with the optimum experience regardless of the network or endpoint equipment used. Land. Sea. Air. Polycom delivers maximum communication capabilities from anywhere, to anywhere.
