

# Polycom Education Solutions

Enhancing collaborative learning and administration at all levels of education

## Education overview

Technology has brought our world closer together, with the various methods of connecting by voice or video or sharing information from a personal device in the classroom. But educators and students face numerous challenges when collaborating at a distance from each other. That's why the right communications solutions are needed to help students learn better.

## Distance education

Physical proximity is no longer the determining factor for successful education. Students can participate in classes from all over the world with simple-to-use, high-quality audio and video solutions—fully immersing themselves in a live classroom experience. Educators find Polycom solutions flexible and useful, and don't even notice that there's technology in the classroom.

## Content sharing

Because students have 2–4 personal devices with them at a time, the classroom should allow students to easily and securely share their work from their devices. That's where Polycom comes in.

## Administration and training

From remote interviews to board meetings and more, school staff and administration benefit from industry-leading audio and video experiences with Polycom. The ease of use and centralized management of Polycom solutions ensure seamless deployments and accelerate ROI.

## Polycom resources

- Grant assistance
- Searchable content database
- Academic and instructional training and services

## Polycom education product showcase

NEED	PRODUCT	BENEFIT
Solutions for high-quality distance education and day-to-day business meetings	Polycom® RealPresence® Group Series 	Better communication and understanding, and more ROI for students and schools. Secure, simple-to-use and easy-to-manage solutions let users collaborate with minimal training

## Customer focus

STEM School, Highlands Ranch, Colorado, U.S.A.

### Technologies used

- Polycom® RealPresence Centro™ and Polycom RealPresence Group Series for distance education (e.g., music, coding and more)
- Polycom RealPresence Centro for in-room content sharing for K–12 social sciences, basic reading and more

### Benefits

- Provides rural communities easier access to education
- Enables worldwide instructors to teach from anywhere
- Facilitates relationships among remote students and teachers

*“Synchronous online learning brings these opportunities to underserved areas, and we start to realize the limitless potential the kids in rural areas have. Connecting all these students is like seeing miracle after miracle. I want every child, no matter where they are, to have the same opportunities the STEM students have.”*

— Gregg Cannady, STEM Concept and Collaboration Developer, STEM School Highlands Ranch
